

VISHAKHA PARESHKUMAR PATEL

Aspiring Software Developer

Ahmedabad, Gujarat, India | +91 63557 48871 | vishakhapatel@gmail.com

[LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [HackerRank](#)

PROFILE SUMMARY

Final-year MCA student with strong foundations in Java, Python, and C++, and hands-on experience in software development, full-stack and mobile application development, API integration, and database design. Took a project from concept to real-world deployment, including a clinic management system currently in active use by a practicing doctor. Consistent academic record (Rank 1 in BCA; 9.12+ CGPA) with a strong grasp of Data Structures, Algorithms, and Object-Oriented Programming. Seeking a Software Developer role to contribute to production-grade systems.

EDUCATION

Master of Computer Applications (MCA) | Expected 2027

LJ University, Ahmedabad

SGPA: 9.13 (Semester 1) — Currently Pursuing

Bachelor of Computer Applications (BCA) | 2025

Veer Narmad South Gujarat University

CGPA: 9.12 — Rank 1 in BCA (Final Result)

Higher Secondary (12th) & Secondary (10th), CBSE

12th: 92.6% | 10th: 88%

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, C, Kotlin, PHP

Web Technologies: HTML, CSS, JavaScript

Frameworks: Flutter, Django, Flask, Laravel

Databases: MySQL, PostgreSQL, Oracle, SQLite

Tools & IDEs: Git/GitHub, VS Code, IntelliJ IDEA, Visual Studio 2022, Android Studio, Python IDLE

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming

PROJECTS

Clinic Management System — Deployed in Production

C#, PostgreSQL, Visual Studio 2022

A complete management system built for a clinic to handle patient records, prescriptions, billing, and profit tracking — currently deployed and in active use by a practicing doctor.

- Developed patient record management and medicine inventory modules
- Implemented prescription/medical history storage and bill generation with payment tracking
- Added profit history tracking and reporting

Online Attendance Management System

Flutter, Python, MySQL, Android Studio

A digital attendance system combining a geofenced session code with face recognition to eliminate proxy attendance.

- Implemented multi-role authentication for Admin, Faculty, and Student users
- Built faculty-generated 4-digit session codes restricted to a geofenced location radius
- Integrated face recognition with real-time attendance percentage and history reports

AI Interview Questions Generator

Django, Gemini API

An AI-powered web app generating customized interview questions with session history and PDF export.

- Implemented user registration with email verification code
- Built question generation via Gemini API, configurable by role, format (MCQ/Q&A), count, and difficulty
- Added answer-reveal toggle, session history, and per-session PDF export

ACHIEVEMENTS

- Rank 1 in BCA (Final Result), Veer Narmad South Gujarat University
- Coding Contest Participation, UKA Tarsadia University, Surat (2023)
